Dear Sirs:

I am writing in regards to your product MILKADE. I breed Chihuahua's and I use your Milkade with my brood females. It has helped them to have a good supply of milk, which they might not have had and helped them to be able to raise the healthiest pups possible by having a steady milk supply until the pups are weaned.

As a breeder it's of utmost importance to maintain pups till they are weaned. With Chihuahua's being so small you want all the help you can get to make sure they survive.

Thanks! for such a great product.

Sincerely,
Patricia A. Page
